

Bug Report – Google Translate (Text Translation)

Bug 01

Bug Id: Bug 001

Reported By: Fathima Fiyaza

Assigned To: Anne Fernando

Severity: Medium

Environment: Chrome/Firefox/Edge Browser, Windows 11

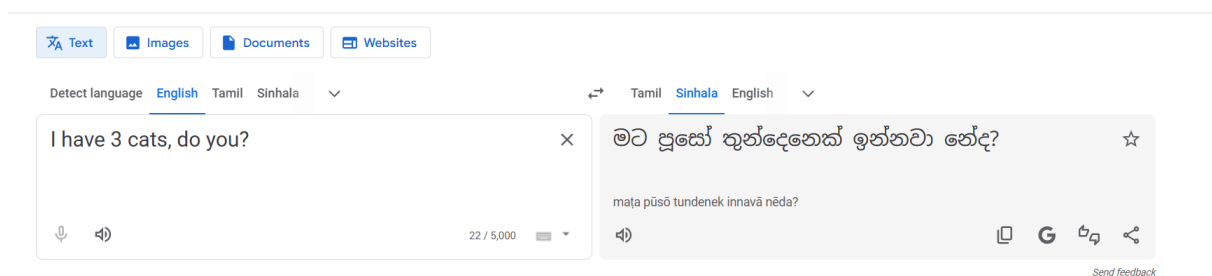

Title: Incorrect sinhala translation for text containing numbers and punctuation marks

Description: When text "I have 3 cats, do you?" is entered with numbers and punctuation marks and translated to sinhala, the generated translation is incorrect

Steps to Reproduce:

1. Navigate to - <https://translate.google.com/>
2. Set source language to "English" and Target language to "Sinhala"
3. Enter "I have 3 cats, do you?" sentence in input field
4. Observe the translated output in output field

Actual Result: Translation displayed in output field is incorrect and doesn't give the intended meaning

Expected Result: Translation displayed should be correct and give the intended meaning as "මම පුසෝ තුන්දෙනෙක් ඉන්නවා, ඔයාටත් එහමෙද?"

Bug 02

Bug Id: Bug 002

Reported By: Fathima Fiyaza

Assigned To: Michelle Fernando

Severity: Low

Environment: Chrome Browser, Windows 11

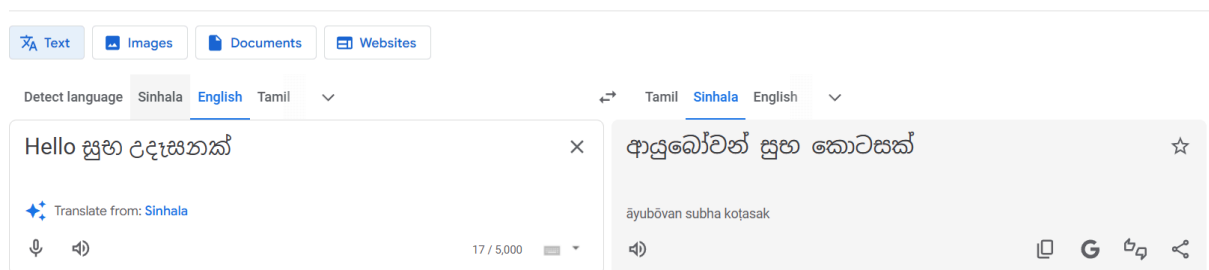

Title: Mixed Language Input displays incorrect translation

Description: When text that contains mixed language is entered, the sinhala translation displayed is incorrect

Steps to Reproduce:

1. Navigate to - <https://translate.google.com/>
2. Set source language to “English” and Target language to “Sinhala”
3. Enter “Hello සුභ උදෑසනක්” sentence in input field
4. Observe the translated output in output field

Actual Result: English text is correctly translated but remaining sinhala texts are altered incorrectly

Expected Result: The first english word “Hello” should be translate to sinhala and the remaining part “සුභ උදෑසනක්” should be preserved remaining unchanged

Bug 03

Bug Id: Bug 003

Reported By: Fathima Fiyaza

Assigned To: Mike Box

Severity: Low

Environment: Chrome/Firefox/Edge Browser, Windows 11

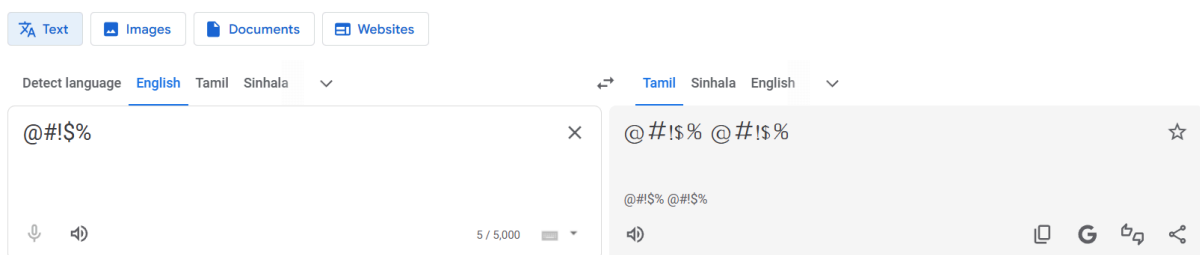

Title: Special Characters get duplicated when translated to Tamil

Description: When special characters are entered and translated to tamil, translation generates get duplicated

Steps to Reproduce:
